

# Hydrating Biocellulose Mask

Immediately provides comfort and hydration to distressed skin

## PRODUCT FACT SHEET

packaging size	product pH level	product should last	additional sizes available
6-pk	Neutral	Single Use	Single Mask

## Key Features (in priority order)

- Immediately soothes skin, making it ideal for procedure pairing with chemical peels microneedling and laser treatments<sup>†</sup>
- Envelops the face with intense, cooling hydration
- Permeable biocellulose material allows skin to breathe and relieves the sensation of heat
- Can be used as a stand-alone treatment when skin feels dehydrated or stressed
- 97% of subjects favorably agreed that it delivered immediate cooling relief and felt calming and soothing on the skin after chemical peel application<sup>‡</sup>

## How It Works

After professional procedures like chemical peels, microneedling and laser treatments<sup>†</sup>, the Hydrating Biocellulose Mask delivers an infusion of heat-reducing hydration to lessen skin discomfort, and the mask stays moist to the touch for sustained benefits. The unique fiber network creates an interlocking 3D permeable material that conforms to the contours of the face while delivering a cooling sensation and allowing skin to breathe.

The Hydrating Biocellulose Mask is clinically proven to deliver immediate relief to skin compromised by professional procedures, leaving skin feeling calmed and soothed<sup>‡</sup>. And the mask can also be used any time skin feels sensitive or distressed or needs a cooling burst of hydration.

## Who Can Benefit

- **Anyone having a professional procedure like a chemical peel, microneedling or laser treatment.**<sup>†</sup> The Hydrating Biocellulose Mask offers immediate cooling relief and intense hydration after any procedure during which skin may become stressed.
- **Anyone whose skin feels stressed.** Sometimes skin may feel stressed due to certain ingredients like retinoids or exposure to sun and wind. The Hydrating Biocellulose Mask is clinically proven to deliver immediate relief, leaving skin feeling calmed and soothed.
- **Anyone whose skin could benefit from a cooling burst of hydration.** The Hydrating Biocellulose Mask is the perfect solution when skin feels dry for a variety of reasons like extreme weather, stressed skin, or hormonal fluctuations and could really benefit from additional moisture.

## How to Use

Tear open pouch, remove biocellulose mask and unfold. Remove both protective linings and apply mask to clean, dry face, adjusting to fit face shape. Leave on for 5-15 minutes. Remove and discard after use.

**Material Composition:** BIOCELLULOSE

**Ingredients:** WATER (AQUA), BUTYLENE GLYCOL, HYDROXYACETOPHENONE, CAPRYLHYDROXAMIC ACID.

# Hydrating Biocellulose Mask

Immediately provides comfort and hydration to distressed skin

## F R E Q U E N T L Y   A S K E D   Q U E S T I O N S

**1 Has the Hydrating Biocellulose Mask been clinically tested with any in-office procedures<sup>1</sup>?** Yes. During a clinical study when the mask was used after a chemical peel application, 97% of subjects agreed that the Hydrating Biocellulose Mask delivered immediate cooling relief and calmed and soothed skin.<sup>1</sup> The Hydrating Biocellulose Mask can also be used after microneedling and laser treatments to cool and calm compromised skin on contact<sup>1</sup>.

**2 How often can I use the Hydrating Biocellulose Mask to relieve discomfort when skin is stressed?** There is no limit to how often you can benefit from the Hydrating Biocellulose Mask. It provides immediate cooling relief and intense hydration after professional procedures<sup>+</sup> or whenever skin is stressed due to certain ingredients like retinoids or exposure to sun and wind. It stays moist to the touch after application to provide sustained benefits.

**3 Does it matter which side of the Hydrating Biocellulose Mask is applied to the skin?** No, both sides deliver immediate cooling and intense hydration benefits.

**4 How can I customize the Hydrating Biocellulose Mask for a perfect fit?** The Hydrating Biocellulose Mask has multiple notches that help it easily fit multiple face shapes and sizes. However, if once your mask is applied further customization is needed, you can carefully make additional cuts so the mask is tailored to fit you. To apply, simply unfold the mask and remove the protective liners on either side. Hold the mask in front of your face aligning the eyes, nose, and mouth, and then smooth into place. You can lift and reposition the mask as needed.

**5 How many times can the Hydrating Biocellulose Mask be used once the foil packet is opened?** For hygienic reasons, the mask can only be used once before discarding.

**6 What is Biocellulose?** Biocellulose is a highly absorbent network of interlocking 3D permeable fibers that conforms to the contours of the face while allowing skin to breathe. The Hydrating Biocellulose Mask is infused with water to deliver an immediate cooling effect when skin is stressed.

**7 What is the recommended application order when using the Hydrating Biocellulose Mask and CMT Post-Procedure Cream™?** After your treatment, start by applying the Hydrating Biocellulose Mask for 5-15 minutes to provide immediate cooling and soothing relief to the skin. Follow with CMT Post-Procedure Cream™ for continued relief from discomfort and to promote recovery. Continue using CMT Post-Procedure Cream™ at home for 3-7 days post-treatment, or as directed by your provider based on your specific treatment plan.
